

The UGR runs Virtual Open Days for prospective students

12/06/2020

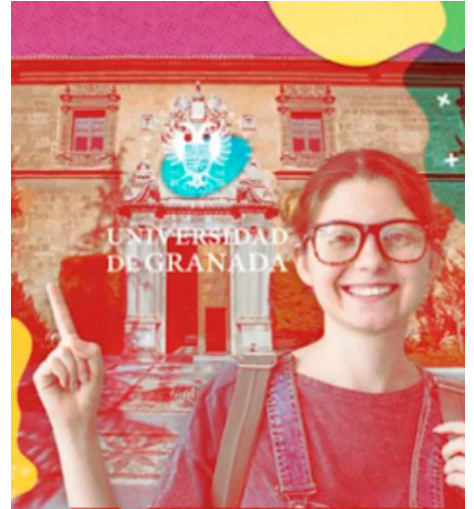

University news & events

- **The Virtual Open Days offer prospective students comprehensive information on undergraduate degrees and admissions at the University of Granada**
- **You can follow our Virtual Open Days on YouTube from 10 to 12 June**

This year, due to the exceptional circumstances caused by the Covid-19 pandemic, we will be unable to hold the UGR Student Recruitment Fair on-site at our campuses. As an alternative, we will run Virtual Open Days from 10 to 12 June to provide prospective students with comprehensive information on undergraduate degrees and admission procedures at the University of Granada.

The Vice-Rectorate for Student Services and Employability, together with the Unit for Academic Guidance and Access to University, has organised these open days with a view to welcoming prospective students to our University. The event has been made possible thanks to the work and cooperation of all the UGR's faculties and schools, as well as the Rector's Office for the Digital University, especially the Resource Production Centre for the Digital University (CEPRUD) and the Secretariat for the UGR Web.

During the Virtual Open Days, different talks will be hosted on the 10, 11 and 12 June by the faculties and schools of our campuses in Granada, Ceuta and Melilla. You can follow these sessions on YouTube.

The heads of our faculties and schools will present the different undergraduate degree programmes taught at the University of Granada, and participants will be able to interact, ask questions and send in queries through a real-time online chat.

Not only will you have access to these online meetings via the website <https://saap.ugr.es/informacion/jornadas-puertas-abiertas>, but also to useful information about the University of Granada; a section on the UGR's faculties and schools with links to their websites and promotional videos; and a section on the undergraduate degree programmes taught at our University with links to their websites, where you can find specific details on each degree (description, competences, academic information, career opportunities, etc.). Moreover, you will find information on key UGR services that are of interest to prospective students.
