Sustainable mobility

By getting around the city in an active way you will not only help the planet, but also contribute to your own physical and mental well-being.

Make the most of the city's bike lanes or travel to classes or work on foot, always adhering to physical distancing measures.

If using public or shared transport, don't forget to put your mask on properly, maintain physical distancing, and sanitise your hands before entering and upon exiting the vehicle.

For further information, please contact the **Environmental Quality Unit (UCA)**:
