Extension of measures in Official Gazette (BOJA) on academic activities at the UGR

23/10/2020

University news & events

The Regional Government of Andalusia has extended the measures published in its Official Gazette (BOJA) in relation to the development of academic activities at the UGR.

Following the extraordinary session of the Governing Council of the Regional Government of Andalusia, the Minister for Health and Family Affairs, Jesús Aguirre, has announced the extension of the suspension of face-to-face teaching activities at the UGR for at least ten more calendar days.

As in recent weeks, the University of Granada shall adopt and abide by the exceptional and temporary measures imposed by the regional health authorities. Furthermore, it will draw on all of its resources to face the serious health situation we are encountering, while once again calling upon the University community and to Granada's citizens to strictly adhere to the preventive measures and behave responsibly and safely. We are awaiting the publication of the updated measures in the Official Gazette of the Regional Government of Andalusia (BOJA) for further details.
