

Universidad de Granada

Biomedical Research Centre (CIBM)

The Biomedical Research Centre (CIBM) is committed to bringing together leading researchers, establishing innovative research programmes, and procuring the technological and financial resources in order to make key scientific advances in the fields of biomedicine and biotechnology.

The CIBM brings together research groups from the following UGR research institutes:

- The Biotechnology Institute (IBT-UGR)
- The "José Mataix Verdú" Institute of Nutrition and Food Technology (INYTA)
- The "Federico Olóriz" Institute of Neurosciences.
- The Biopathology and Regenerative Medicine Institute (IBIMER)

For further information please visit the [Biomedical Research Centre \(CIBM\) Webpage](http://www.ugr.es/)
